## **SUBJECT: New Argentinean laws about motorcycle helmets**

AGV was informed about new Argentinean laws which are asking users to apply big stickers on helmet surface.

AGV always recommends its customers by proper instructions that:

- 1) No attachments should be made to the helmet except those recommended by the helmet manufacturer.
- 2) To maintain the full efficiency of the helmet there must be no alteration to the structure of the helmet or its component parts.
- 3) The protection given by the helmet may be severely reduced by the application of any adhesive, stickers and transfers (in the case where some foreign substance are likely to deteriorate the quality of the materials for the protective helmet).

Then AGV is worrying that some not proper sticker application both from a material and dimensional point of view could vary helmet safety properties.

That fact could not be managed and controlled by AGV itself. In this case AGV would be forced to not be able to have complete control on safety of helmets used on the market

Sincerely,

Moreno Businaro  
AGV CEO
